Blower Wheels

Overview

Blower wheels are ideal for a wide array of air moving applications, including refrigeration and HVAC, general machinery (such as packaging machinery, shoe-making machinery, food machinery) commercial and industrial equipment, electronic products, electrical appliances and more.

Features and Benefits

- Custom designed solutions for OEM's - single or double inlet, various bore sizes and diameters
- Diameters available from 1.5 to 12 inches
- Manufactured from aluminum plate, galvanized plate, or stainless steel plate (SUS 304)
- All models use hexagon socket screws, which are good for balance and noise reduction
- Wheels produce high air volume with low vibration to minimize noise
